RE: Mississippi Clean Hydrogen Hub Project

TO WHOM IT MAY CONCERN:

The Board of Supervisors of Simpson County, Mississippi, hereby expresses its support for the Mississippi Clean Hydrogen Hub Project proposed by Hy Stor Energy LP. The Board believes that this project will greatly benefit the citizens of Simpson County and provide a clean energy resource for our community and assist in the reduction of carbon emissions which affect our County, State and Nation.

We believe this project will provide a tremendous stimulus for our local economy through the development and construction of this project and future employment of skilled employees and will be a significant benefit to our citizens.

We are advised that the Mississippi Oil and Gas Board has approved special field rules governing the D'Lo Salt Dome in our County which will allow for underground storage of green hydrogen. Simpson County and its infrastructure are strategically located to accommodate the transport and storage of green hydrogen from this underground salt cavern.

Please advise the Board if there are any questions or if you wish to discuss any aspects of the project and the benefits it will bring to the citizens of Simpson County, Mississippi.

Truly yours,

Mitchell Chatman, Supervisor

Danny Craft, Supervisor

Brian Kennedy, Supervisor

Donny Welch, Supervisor

Randy Moore, Supervisor
